#### **Scholarship - Awards**

See page 2 - Awards for Scholarship

#### **ACTION RESEARCH AND COMMUNITY ENGAGED SCHOLARSHIP**

##### **Selected Action Research, Projects, and Programs**

2022 **One Seattle: Re-establishing housing diversity in Seattle's neighborhoods**  
Demountable pavilion and thematic exhibit of student work from Architecture 594 Research Seminar and Architecture 508 Research Studio to engage the public in the Major Update to Seattle's Comprehensive Plan, provide visualizations of new "Missing Middle" housing typologies, and illustrate potential neighborhood change. In collaboration with Matt Hutchins and the Seattle Office of Planning and Community Development (OPCD).

2020-present **Seattle Street Sink, Clean Hands Collective**  
Founding member (with Elizabeth Golden and Brice Maryman) and design and fabrication lead for a volunteer effort focused on addressing the public health crisis impacting the people experiencing homelessness in the wake of the COVID-19 pandemic. Working with Real Change, a Seattle-based advocacy organization for the unhoused, the collective developed inexpensive, off-the-shelf, and replicable handwashing stations with integral raingardens to treat greywater onsite. An online platform with parts lists and DIY videos allows the project to "go viral" with Street Sink spin-offs installed in eastern Washington State and Durham NC. Project received

funding from the Seattle City Council. Recognized with multiple awards (see page 2 - Awards for Research).

- 2018-present **Sound Communities**  
Founding steering committee member (with Gregg Colburn, Marty Kooistra, M.A. Leonard, Al Levine, Peter Orser and Faith Pettis) of a volunteer effort from the academic, public, non-profit, and private sectors focused on leveraging the Puget Sound Region's historic investment in light rail and bus rapid transit to address its housing crisis at scale by building complete communities with an abundance of affordable housing at transit hubs. Informed by the work of a 2017 UW CBE interdisciplinary design studio (co-taught by Mohler and Levine), Sound Communities is pursuing state legislation to establish Housing Benefit Districts at high-capacity transit stations to generate revenue for land acquisition, infrastructure investments and station area planning. The project has received funding from the UW College of Built Environments, the JP Morgan Chase Foundation, and the Washington State Department of Commerce.
- 2019-2020 **ADUniverse, UW Data Science for Social Good Program and the Seattle Office of Planning and Community Development**  
Co-Lead (with Nicholas Welch) of project sponsored by the UW Data Science for Social Good program to develop an online application for Seattle homeowners to determine the physical and financial feasibility of developing an accessory dwelling unit (ADU) on their lot. The project was implemented by the City of Seattle's Office of Planning and Community Development in 2020 as part of a single online platform for all things ADU which has adopted the "ADUniverse" moniker. Recognized with multiple awards (see page 2 - Awards for Research).
- 2018-present **Seattle Single-Family Zoning Reform, Seattle Planning Commission**  
Co-Chair (2021-2023 with Jamie Strobel) and member of sixteen-member advisory commission appointed by the Seattle Mayor and City Council to advise them regarding housing, land use and transportation policy. Since 2018, the commission's research has been largely focused on addressing the racial and social inequities of Seattle's Urban Village Growth Strategy and proposing strategies for increasing the quantity and variety of housing types in Seattle's Neighborhood Residential (formerly Single-Family) zones. This includes the release of three reports and the ongoing release of issue briefs of interest to the Mayor, City Council, city staff and public regarding Neighborhood Residential zoning reform in the major update to Seattle's Comprehensive Plan to be completed in 2024.
- 2015-2017 **A City to Love: Visions of a Public Realm, Affiliate Fellowship, Runstad Center for Real Estate Studies, University of Washington**  
One of seven (two faculty, two professionals and three graduate students in Real Estate) affiliate fellows to receive funding for collaborative international interdisciplinary research addressing urban challenges facing the Puget Sound Region. On-site research in Auckland, NZ focused on the city's successful efforts to dissolve city departmental silos, its urban design strategies, public/private development partnerships and the consolidation of regional governance through the creation of the Auckland "super city" in 2009. The research yielded a one-hour presentation which was delivered over a dozen times to Seattle and Puget Sound Region elected officials, public agencies, business leaders and the public and was the focus of the Fall 2017 issue of *Arcade* magazine, for which the Fellows served as guest editors.
- 2009-2010 **Future Shack: Housing the 21st Century, AIA Seattle**  
Founding co-chair of a new public-facing residential design symposium and awards program focused on shifting the public and professional interest in housing away from single-family "life styling" to one of addressing an emerging housing crisis in fast-growing cities. Consisting of public

exhibits, panel discussions and awards, the event was the focus of a segment of *Weekday* on Seattle public radio KUOW and featured on the cover of the *Seattle Times Pacific NW* magazine.

1993 **Designing for Density, Ideas for More Compact and Affordable Housing, WA State Department of Community Development**  
Member research team (Douglas Kelbaugh and David Wright, Principal Investigators) for study of urban design strategies and small-scale multi-family housing types for suburban infill development.
